You don't usually receive emails from this address. Make sure you trust this sender before taking any actions.

Jackson,

Thanks for reaching out.

1. You have our permission to share these images.
2. Here's our website you can link: https://madebymesa.com/
3. Photographer is Daniel Meigs: https://danielmeigs.com/wordpress/
4. Here is the link to the photography that includes this image, which you can download. I have also attached the images I find relevant. We did use the EC490 for some back bar mirror frames, but the photography we got of them doesn't highlight the trim well. I have attached those photos anyway. https://danielmeigs.pixieset.com/mesa2026/618photos/

Let me know if there is anything else you need.

I know you've used our product a few different times and I was wondering if we could use any of the great pictures you have on your own website on our new website that we are designing? We would of course provide full credit to your company (along with any other companies necessary) plus a link back to your website.

One example is below which we shipped out to you in September. I know we've also sent you some EC490 for the Boka project, not sure if you have pictures of that yet. Anyways, if we have permission, would you mind replying with:

1. A quick note confirming we have your permission to share them
2. The URL you would like to link with the image
3. If there is any additional credit, such as photographer, that we would need to note
4. Any additional images that may be used

Thanks,

Jackson Carter
